A Protest from a Enchanan Organ.

The Stevens Point Pinery veteran Democratic paper and stanneh in its loyalty to the Administration, thus represe the tricksters who managed the Democratic Conventions in the Congressional Districts of this State, and who, afraid to avow their real opinions, ignominiously dodged the issues of the Fall camprign :

The Democratic Congressional Conventions in this state have all three been held, and put their candidates before the people;—Beriah Brown in the first, Charles Dunu, in the second, and Chas. H. Larrabee, in the third. The men are not all of them such as me should have chosen to represent the State in Congress; yet if elected, we should, on the whole, have a powerful representation in that beds. But we confess to our disciplination in that beds. But we confess to our disciplination in that beds. in regard to the position (or rather want of po-sition) they have assumed before the people.— As to the first district, we have already express-ed our opinion; those of the accord and third have done no better, but rather worse. The third, "Reserved that the Cincianati platform be the pla form of this Convention;"—the accord, could not afford a single plank—not even a splin-

Toese proceedings are equivocal, and entirely uncerthy the usays of the honest democracy.—
The design is doubtless to repudiate the National Administration. If so, why had they not the madiness—the honesty to say so?—their refusing to make some plain declarations, in reserved to it is an equival to a result of the gradest. gard to it, is an attempt at a practical fraud on the rank and pie of the party. We know, and so did the members of these several conventions, that while there are many, especially among the soi disant leaders of the democratic party, who love the treason of Judge Douglas, thus the great democratic heart of the party in this State, still ceate true to the great statesman they ele-vated to the Presidency in 1886, and to his faultless Administration of the affairs of the Nation. These voters, who have hitherto stood by us with their noble ranks, will be struck back with thame at the craven spirit of their leaders in the conventions, and will many of them think it hardly worth while to inquire as to who the men are that are strempted to be stood up be-

fore them for their suffrages on----nothing. But, however Conventions may dodge and party leaders ignore, the issues before the people, the Pinery is determined that its readers shall not be decrived. It thus boidly proclaims that the great question before the voters of Wisconein, this fall, is, whether they sustain, or condemn the Administration of Mr. BUCHANAN:

ROMAN CATROLIC PRIESTS AGAINST CELIBACY. —An extraordinary memorial has been addressed by 507 Austrian priests to the author of the loncordat, the Cardinal Prince Archbishop of Vienna. After complaining of the increased power assumed by bishops, the antiquated medieval ordinances of the church, their poor pay, &c., they make a demand for the abolition of cel ibacy, on the ground that the impossibility of entering into the married state renders the priest the victim of suspicion, sneering and contempt, and produces laxity amongst the clergy, thus rendering them contributors to the moral dissolution which is invading even the popular class.

Terrible Adventure An Aeronaut Lost in the Clouds.

It is a brief narrative, but of thrilling interest. A man lost in the sky! There can acarcely be a more terrible thought. It makes the flesh proep and sends a shudder through every nerve! The first secension took place about 9 o'clock

The first ascension took place about 9 o'clock in the morning. It was on the occasion of a Sunday School celebration at Adrian. The belloon was a very large and well constructed one, being about the height of a two-story building, when inflated and ready to cut loose from its fastenings. Messare. Bannister and Thurston took seats in the car, attached to the balloon and ascended safely and steadily. After remaining about 40 minutes in the air, salling towards. Toledo all the time, they slighted in the woods in the form of Riga, Lenawec county, near Kulght's station on the Southern Road, distant about 18 miles west of Toledo. Several men came to the sesistance of the adventurers, and come to the assistance of the adventurers, and

Wiscopein, this fall, is, whether they gustain, or condemn the Administration of Mr. Buchanan; But these cumping conventionists, shude (and that indeed but faintly) to the Cincinnati platform; all very well gentiemen, an initio; but you very well know that we have now, at this campaign, another, a mere intense Issue to meet; it is whether a few distinguished leaders of the democracy in the nation, whose ambition has distanced their reason, and who have joined the Black Republicans to break down. Mr. Buchanan, shall be endorsed by the rank and file of the democracy; this is the real practical issue, and no finese or cunning of leaders can blink it, or make it "down" for this fall; it is thrust upon us by such men as Judge Douglas, aided by the Abolitionists, and it has got to be met.

There was nothing to be lost, but every thing to be gained, by these conventions adopting plair, unmistakable platforms—resolutions approving of the course of the President; and this the sequel will prove.

As for the nominee of this district, Judge Duns—we shall support him to the extent of curhumble powers; we know him to be a stateman — gentleman, and a man of decided talent, a sound National Democrat, and we doubt not a firm friend and consistent supporter of the National Democrat, and we doubt not a firm friend and consistent supporter of the National Democratics and the gas to escure. He could only cling to this received the administration. If not have event to be taken back to Adrian.

Resolved. That we expect and consider it the right of the counties upon the Lake Shore to demand from the man elected by their suffrages, some attention to their wants, and a proper extion to secure for them such assistance from the general government as their necessities requere; and in awarding to the present nominee of the party our cordial support, we do it in the faith that if elected, he will work, and work ably to promote the best interests of his constituents, as well in the east as in the west.

Though vaguely expressed, this resolution means that "the Counties upon the Lake Shore" expect Judge LARABES, if elected, to get them the necessary appropriations for the improvement of their Harbors, &c. They may as well dismiss any such expectations.

to propitiate the electors of his District by such appropriations. The Western States will look in valu to the Democratic party for any attention to their just demands until they have made their power felt by sending to Congress—as the South elected from the West, only serves to postpone as the West, in spite of the injustice which it suffere, continues to send Democrats to Washington, just so long will the party persist in refusing to appropriate a cent for the improvement of our Rivers and Harbors, though always ready to lavish millions for the advancement and protection of Southern laterests. The remedy for this wrong is in the hands of the Western Pecple. Shall they not apply it?

Our readers will remember that a few days since the Milwaukes News following in the waks of the Chicago Times, made a similar attempt to "limit and reduce the scope of the Died Scott decision." We exposed the cheat at the time, but the News still clings to the deception, being atraid to tell its readers the whole truth. The Madison Argus, referring to the progress of the Union, it will be seen by the above, atoutly Capitol enlargement-which, by law, was all to contends for the full scope of the decision, and be completed for \$100,900-thus quietly pre-Boonta the idea, commingly put form by Souther.

The News begins to find that its old party cat-calls on this theme have ceased to impose upon the more intelligent of our adopted citizens. So it now proposes to try another trick and soeer s at them in this wise:

The republicans hold that a white man of foreign birth is not the equal of the native born tegro. They propose to exclude the former from, and admit the latter to the polls. We believe with the Tribune that a very respectable number of persons of European birth, will aid the republicates in cetablishing such a distinction. We are aware that such an admission is icculting to our adopted citizens, but the Tribune is not without sufficient data to justify it, in openly declaring that such things are neith-er alarming nor discusive to "republicans of European birīb.

Tile is not only " insulting to our adopted citizens," as the News intended and admite it to be, but is grossly false as to the Republican creed. They hold no such doctrine, put forth no such proposition, as the News alleges .-They believe, with the Declaration of Independence, that "all men are created equal," and they do not believe that this God-given equality is impaired, or restricted by any difference of creed, color, or birth place. Still less do they believe with the News, that "a very respectable number vato the native-born negro above the foreignmake a chargese "insulting to our adopted citizene." These ill mann red and unfounded sneers the demagogueism of the News and the Sham Democracy, and who will no more follow their lead and do their bidding, are eminently characteristic of the Know-Nothing organ.

Here is something for Wisconsin to think about. We have now three Representatives i Congress, who have served the people diligently, ably and faithfully for three years past. They have in action. Emulating the vertex of their adversary, they have kept at their Central headquarters a register of the number of votes in every town of the state, carefully classified according to the shades of their politics. From many towns they had a liet of names, a attement of the political antecodents, &c., of every elector, and to honorable means were left untried to supply the desired information and obtain the follest possible vote. Pincing a just confidence in the soundness and necessary poputo manage in the southerness and betternly popularity of their cause and the utter importance of the Know Nothing organization, the Republicance contented themselves with a steady adherence to that broad and generous platform on which they started, knowing that whatever there was worth having in the paralyzed factions of old Whiggery and Nativism would apparancously come upon it. Mr. Garagebe, superintendent, made the cylin-Mr. Garasche, superintendent, made the cylinders for the Hazard Company of raw-hide, thinking the danger decreated by the change. The new mill was a building perhaps 30 feet square, with a gentle bill on two sides, and a brook on the west. The water wheel divided the building; the cylinder mill being on the cast and the giszing mill on the west. The latter had not been used at all. On Saturday the cylinder mill, (two cylinders perhaps eight feet long, by three feet in diameter,) was put in operation pulvoir, leet in diameter,) was put in operation pulvoir, long saltpetre. ROBBERY OF THE UNION BANK, KINDZREGOK.—
The Union Bank, of Kinderhook, was burglarously entered last night and robbed of from
\$0,000 to \$3,000. The burglars got in at the rear
window. They broke open the outside shutter,
and bored through the inside shutter, which enabled them to raise the window bar and get into the Bank. The large iron door of the safe,
weighing about 300 lbs., was blown off, by powder, with such force as to be thrown entirely
across the room. It is supposed that about the
sum above named was taken—mostly in bills—
The exact sum is not known as the Cashier is
abeent.

A portion of the bills taken were mutilatedbaving been withdrawn from circulation, and were soon to be returned to the Bank Depart-ment to be destroyed. It is possible, also, that some or all of the bills were scorched, as portions of the papers in the safe were-probably from the fire communicated by the explosion.

The clock stopped at half past one, A.M.—
That was doubtless the time of the explosion;
but it was not heard by any person in the neighborhood. The officers of the bank have no clue to the robbers .- Albany Evening Journal, Sep

overed on the 4th of January; but as the first four will form the subject for another article, we will say no mere about them hero.

The comet now visible will pass its perihelion—according to the elements of Mr. Geo. Scarle, Assistant at the Dudley Observatory—on the 18th of September. The parabolic elements of a comet's crobt are six in number, namely time of perihelion passage, longitude of the perihelion, longitude of ascending node, inclination of the plane of its orbit to the plane the ecliptic, the perihelion distance, and the direction of its motion. If the motion in the same direction around the sun as the motion of the planets, it is said to be direct; it in the opposite direction, retrogade.

The longitude of the perihelion of this comet is about 30 deg., and of the ascending node about 186 deg. The inclination is about 66 deg.

The perihelion distance is about 40,000,000 miles, or a little greater than the mean distance

the market was toleranty active, although there was quite a material decline at the opening on shipping grades of Spring Wheat, foll 3 to 4 cents. The fact is that shippers have been operating at a loss for some time past, and prices have been kept up to a figure that left no margia for shipment to the East, by an active competition amongst designs, in anticipation of an advance in the seaboard markets. This condition of things could not long contin-ue to exist, and hence the present change in our market in the face of a contrary movement at the East. The pla form sales to day, as far as reported to us, are upward of twenty-three thousand bunbels, the greater portion o which was No. 1 Spring, at 50.
